

Duplin County Animal Response Team

Acknowledgments

The Duplin County Office of Emergency Management wishes to acknowledge the members of the County Animal Response Team for their full participation and coordinated efforts, which will make this procedure viable. Membership of this multi-jurisdictional task force consist of the following persons and agencies:

County Animal Response Team Committee (CART)

Ed Emory, Duplin County CART Coordinator, North Carolina Cooperative Extension
James Parsons, Area Specialized Poultry Agent, North Carolina Cooperative Extension
Dorothy Cavanaugh, Duplin County Emergency Management
Harold Jones, Duplin Soil and Water Conservation District
Scott Harrellson, Duplin County Health Department
Harrison Lanier, Duplin County Solid Waste
Ricky Darden, North Carolina Forest Service
Chad Starbuck, North Carolina Wildlife Resource Commission
Dr. Dan Wilson, North Carolina Department of Agriculture, Veterinary Division
Jim Barnhardt, Duplin County Manager
Kettrell Strickland, Farm Service Agency
Star Maready, North Carolina Cooperative Extension
Danny Fryar, North Carolina Department of Agriculture, Veterinary Division
Reuben Crumpler, North Carolina Department of Agriculture, Veterinary Division
Gerald Lanier, Duplin County Animal Control
Pat Sholar, North Carolina Department of Agriculture, Veterinary Division
Jimmy Gurganus, Ag. Protein
Dr. Shannon Jennings, Carroll's Foods
Dr. Gordon Meyer, Nash Johnson & Sons
Donald James, Prestage Farms

1.0 INTRODUCTION

There is little doubt that governments throughout the country now recognize a pro-active need for disaster planning throughout its agencies, other agencies, integrated companies, and individual citizens. This disaster planning is understandably developed with the safety of people in mind. It is only recently

that disaster planners across the country have started to realize how drastically failure to plan for the animal population will affect the viability of their disaster plans for people. For instance, if the disaster warrants an evacuation, many people will not evacuate without their animals, or will delay their own evacuation in an attempt to make preparations for their animals left behind (livestock and companion animals) to their own detriment. These refusals or delays begin a chain reaction which can seriously jeopardize or cause a total breakdown of the overall disaster plan.

In addition, failure to plan for animals creates serious public health concerns with injured or dead animals. Failure to plan for animals causes considerable public safety problems as animals roam unattended, causing automobile accidents and other injuries to people which would add to an already over-taxed emergency medical system. And finally, failure to plan for animals will create a public relations nightmare for those agencies which the public perceives as "animal responsible" if animal issues are not properly addressed in the wake of the disaster.

1.1 PURPOSE STATEMENT

To protect wild and domesticated animal resources, the public health, the public food supply, the environment, and to ensure the humane care and treatment of animals in case of a large-scale emergency, including hurricanes, tornadoes, floods, wind driven water, drought, fire, explosion, building collapse, commercial transportation accidents, chemical spills, nuclear power plant accidents, or other situations that cause animal suffering.

1.2 SCOPE

This plan is intended for use by local government and agencies to take immediate action in providing a means of care and control to minimize animal suffering in the event of a large-scale emergency. This action will be aimed at all animals that may need help whether such animals are owned, stray, domestic or wild.

The Duplin County Office of Emergency Management may place into effect, established plans and procedures, and direct both the emergency and recovery aspects of the incident. The office may deviate from these procedures when, in its judgment, immediate and direct action is necessary to protect public safety.

2.0 AFFECTED AGENCIES/RESPONSIBILITIES

2.1 PRIMARY AGENCIES

- A. Duplin County Cooperative Extension

Coordinate support agencies to manage animal protection in large-scale emergencies.

Provide and coordinate personnel, equipment and shelter as required to aid in the protection of livestock during an emergency situation.

B. Duplin County Emergency Management

Activate the Emergency Operations Center, if necessary. Responsible for the overall direction of the emergency incident.

C. Duplin County Health Department/Animal Control

Provide guidance and support to ensure the safety of all citizens.

Coordinate support agencies to manage animal protection in large-scale emergencies.

D. Duplin County Soil and Water Conservation District

Provide personnel and support in locating displaced animals. Provide support for mortality disposal.

E. Integrated Livestock/Poultry Companies

Provide personnel, equipment and support in locating and moving displaced animals. Provide sites, equipment and support for mortality disposal.

2.2 SUPPORT AGENCIES

A. State Animal Response Team (SART)

Provide volunteers, assistance, information, supplies and expertise in caring for animals.

B. Duplin County Maintenance Department

C. ~~Provide volunteers and equipment~~
American Red Cross, Cape Fear Chapter--Michael Lambrix

Provide volunteers to assist in the protection of animals during an emergency shelter situation. Work with Emergency Management in the coordination of animal shelters in the county.

D. NC Department of Agriculture

Responsible for the enforcement of state regulations concerning livestock health and the movements of animals affected by those regulations. NCDA will also assist in providing

information and direction whenever possible with regard to the general health of livestock in these areas.

E. Unmet Needs

Provide volunteers to assist in proper care of affected animals.

2.3 ADDITIONAL RESOURCES

A. Duplin County Livestock Association

Provide personnel, resources, and equipment.

B. Carolina Coastal Equine Veterinary Service

Provide veterinary care to equine

C. Private Farms

Provide shelter and supplies to care for displaced animals.

D. Private Kennels, Stables, etc.

Provide personnel, equipment and shelter as required to shelter and care for pets from evacuated citizens and in cases when established animal shelters are filled or destroyed.

E. Other Private Veterinary Clinics

Provide veterinary care to animals.

F. North Carolina Wildlife Commission

Provide personnel and equipment as required to protect wildlife.

G. North Carolina Forest Service

Provide personnel and equipment as needed to protect and care for animals.

H. North Carolina Veterinary Medical Association

Provide personnel to aid in the medical treatment of animals. Activate regional Veterinary Medical Assistance Teams (VMAT)

I. Farm Service Agency

Provide funding and cost share assistance when available .

J. American Humane Association

Provide personnel and equipment as required to rescue and care for domestic and non-domestic animals.

- K. Humane Society of the United States
Provide personnel and equipment as required to rescue and care for domestic and non-domestic animals.

2.4 Sub-Committee Representatives

- A. Equine
Committee Members and Contacts See Appendix A
- B. Domestic Pets (cats, dogs, etc.)
Committee Members and Contacts See Appendix B
- C. Livestock/Poultry
Committee Members and Contacts
- D. Mortality Disposal
Committee Members and Contacts See Appendix D
- E. Communications/Public Relations
Committee Members and Contacts See Appendix E
- F. Wildlife
Committee Members and Contacts See Appendix F
- G. Incident Commanders
Committee Members and Contacts See Appendix H

3.0 PLANNING ASSUMPTIONS

- A. The owners of pets or livestock, when notified of an upcoming emergency, will take reasonable steps to shelter and provide for animals under their care and/or control.
- B. Natural, technological or manmade disasters could affect the well being of domesticated or non-domesticated animals.
- C. The county should plan for both emergency situations and to carry out response and recovery operations utilizing local resources. Outside animal care and rescue assistance

would likely be available in most large-scale emergencies affecting the county.

- D. Animal protection planning should ensure the proper care and recovery of animals impacted during an emergency. These plans may include measures to identify housing and shelter for animals, communicate information to the public and proper animal release.
- E. Public information statements will be issued through the various media outlets. This information will include locations where animals may be accepted during emergency situations.
- F. A large-scale emergency in Duplin County may warrant immediate response from state and local personnel, agencies and organizations. However, emergency situations may become compounded due to the nature of the emergency and also require activation of additional specialized agencies through mutual aid.
- G. Through effective animal protection planning and organization, disaster relief efforts would be more expedient.

4.0 CONCEPT OF OPERATIONS

4.1 GENERAL

- A. The primary and support agencies identified in the Standard Operating Guideline will manage and coordinate local animal protection activities. These agencies will use established animal protection and support organizations, processes and procedure. Responsibility for situation assessment determination of resource needs in the event of a large-scale emergency lies primarily with Duplin County Emergency Management in cooperation with the Duplin County Cooperative Extension, Duplin Soil and Water Conservation District, Duplin County Animal Control and local incident coordinators.
- B. Requests for animal protection assistance and resources such as food, medicine, shelter material, specialized personnel and additional veterinary medical professionals, will be transmitted through the Duplin County Emergency Management Office to the North Carolina Emergency Management Office. Should the need for Federal or State resources exist, the State Emergency Operations Center will coordinate the requests for assistance.

- C. Animal protection operations will be managed under the Duplin County Incident Command Master Plan (ICS). Public health concerns will be managed in accordance with appropriate Duplin County plans and procedures.
- D. Animals included under the plan:
1. The sheltering and protection of domestic and non-domestic animals (including livestock) are the responsibility of their owners.
 2. Domestic and non-domestic animals that are lost, strayed, incapable of being cared for by their owners, or in danger to themselves or the public will be the responsibility of Duplin County Animal Response Team. These animals will be sheltered, fed, and, if possible, returned to their owners. If the animals cannot be returned to their owners, they will be disposed of in accordance with established animal control procedures.
 3. Wild animals should be left to their own survival instincts. Wild animals out of their natural habitats that are in danger either to themselves or the public will be the responsibility of the N. C. Wildlife Resource Commission personnel, in cooperation with local animal control officials, and returned to their natural habitat if possible.

4.2 Notification:

This plan and implementing procedures will be activated in the event of a large-scale emergency causing a significant need for animal protection. Duplin County Emergency Management will determine when these procedures will be implemented and notify the appropriate primary, support, and mutual aid agencies. A call down notification system will be maintained by Duplin County Emergency Management.

4.3 Communications:

Communications between the primary and support agencies and large livestock operation companies (See Appendix E) will occur primarily through telephone, facsimile and cellular telephone transmission. Amateur radio will be used as a backup system if other communication is impossible due to the nature of the emergency situation. A satellite phone will also be available at the emergency operations center.

A list of radio and t.v. stations is attached for the purpose of public notification when necessary.
(See Appendix I.)

4.4 Public Relations:

The County Manager and County Extension Director (or designees) will act as official spokespersons for Duplin County. They will be responsible for the coordination of all media activities and press releases associated with the protection of animals.

Public Relation responsibilities may include:

1. Promote public awareness and inform animal owners how to prepare and react to all types of disasters through literature, community relations and/or seminars.
2. Recruit volunteers to assist where needed in the event of a disaster.

4.5 Public Information:

A spokesperson from Duplin County will be responsible for the coordination of all media activities and press releases associated with the protection of animals. PI responsibilities may include:

1. Notifying the public of appropriate shelters to drop lost/stray animals, animals that they cannot care for, or animals that need immediate medical assistance.
2. Delivering instructions to the public to prepare their pets for an impending emergency.

4.6 Response: (*) Indicates that information has not yet been obtained.

The owners of pets or livestock, when notified of an emergency, will take all reasonable steps to shelter and provide for animals under their control.

A. Equine

1. Search and Rescue

Equine loose or in need of assistance due to the emergency or to the death or evacuation of their owners will be the responsibility of the Equine committee (in

so much as all reasonable steps will be taken to provide assistance). Identify key people to assist rescue efforts in field who have animal handling training and understand the basic emergency management concepts (ICS training).

Appendix A Identify transportation equipment and enclosures. Appendix A Identify sources for animal restraint equipment lead lines, halters.

Appendices A and G

2. Evacuated Equine

a. Private Resources:

Equine from evacuated citizens will be sheltered at private facilities, at the owner's expense.

Carolina Coastal Equine will maintain and update a list of participating shelters and veterinary clinics. Appendix A

A representative of the Equine committee will provide assistance in the transportation of the evacuated livestock to either the shelter facility or veterinary hospital and ensure that a tracking system is in place to unite sheltered Equine with their rightful owners.

Transportation to be provided by individuals who do local transport of equine. The equine owner is expected to reimburse transport individual.

Other private horse owners will also be available to assist with transport.

b. Equine Evacuation Shelter:

If the need arises, the CART may open an Equine shelter. Equine will be evacuated and sheltered by the owner or the owner may request assistance from the livestock committee. A shelter or non-occupied equine facility is difficult to find and maintain for an emergency only basis. Duplin County has no equine show facility such as the Hunt Horse Complex. Evacuated equine would need to have shelter at private boarding barns or with private individuals. This list of people would be kept but could/would change according to available space. Feed, hay, bedding, etc. can be obtained through resources listed in Appendix G. Additional supplies, including corrals and panels may be requested from SART.

Equine committee volunteers, SART personnel and private individuals will be trained in equine management and will help maintain facilities.

3. Stray/Lost Equine

Due to the size of most equine and the inability to transport large numbers of equine, owners are expected to develop shelter and/or evacuation plans for their own animals.

Private farms located throughout the county may be used as shelter facilities for equine.

In the event of an emergency situation, the Equine committee will contact prearranged farms and request their assistance in the sheltering operation.

Appendix A

The owner will be expected to reimburse the private farms for all expenses incurred during sheltering of equine.

If necessary **SART** may be contacted for boarding assistance of equine at possible locations such as: veterinary hospital at the NCSU College of Veterinary Medicine, the Hunt Horse Complex and the Pinehurst Harness Track.

4. Recovery

Equine

Duplin County Animal Control will support efforts to identify owners of stray/lost animals. If owners cannot be found, representatives will attempt to adopt or sell the animals according to their established procedures. Animals for which no owners can be found and which cannot be placed in adoptive care or sold will be disposed of in accordance with established animal control procedures.

B. Domestic Pets:

1. Search and Rescue

Domestic pets loose or in need of assistance due to the emergency or to the death or evacuation of their owners will be the responsibility of the Domestic Committee (in so much as all reasonable steps will be taken to provide assistance).

*Identify key people to assist rescue efforts in field who have animal handling training and understand the basic emergency management concepts.

*Identify transportation equipment and enclosures.

*Identify sources for animal restraint equipment muzzles, leather gloves, rabies poles, leashes.

2. Evacuated Domestic Pets

a. Private Resources:

Domestic pets from evacuated citizens will be sheltered at private boarding kennels and veterinarian hospitals as close to the evacuation shelters as possible, at the owner's expense.

Upon the activation of evacuation shelters for citizens, a representative from the Duplin County Domestic Committee will be contacted by the shelter manager and requested to initiate the opening of prearranged private boarding kennels and veterinarian hospitals as boarding facilities.

*Maintain a list of participating shelters and vet clinics.

Each of the citizens' evacuation shelters will have an available animal caretaker volunteer on the premises to evaluate the pets of evacuated citizens. Pets with significant injuries or illnesses will be transported to an animal hospital designated for the medical treatment of animals.

*Maintain a list of participating shelters and vet clinics.

A representative of the Domestic Committee will provide assistance in the transportation of the evacuated pets to either the shelter facility or hospital and in ensuring that a tracking system is in place to unite sheltered pets with their rightful owners.

*Transportation provided by animal control.

*Transportation assistance from local breeders of kennel clubs.

b. Animal Evacuation Shelter:

If the need arises, the CART may open an evacuated pet shelter. Pets of evacuated citizens will be transported to this shelter as citizens arrive with their pets at the citizens' evacuation shelters.

*The shelter will be located at.

*The facility will be constructed of.

*Cages will be requested from SART.

*Food and supplies will be obtained through.

*Volunteers for maintaining the shelter are who.

Volunteers will be trained by SART members.

c. Evacuated Citizens with Special Needs

Citizens with special needs (individuals with mental or physical handicaps who require evacuation assistance) may require assistance in evacuating their pets. If special needs individuals are unwilling or unable to make special arrangements for the sheltering of their pets, then the individuals and their pets will be transported to the evacuation shelter. Upon arrival at the shelter, pets not trained specifically to assist the individual (e.g. seeing eye dogs) will be transported to a private boarding facility or other appropriate facility. Boarding will be provided at owners expense.

3. Stray/Lost Domestic Pets

All stray/lost domestic pets recovered by Duplin County Animal Control will be sheltered at the Duplin County Animal Shelter or temporary shelters set up for this purpose. Any pets whose owners cannot care for them or domestic pets found by citizens will also be sheltered at these locations.

Private boarding kennels and veterinarian clinics will serve as overflow shelters and will be requested to open through the Domestic Committee representative as necessary.

4. Recovery

Domestic Pets

Duplin County Animal Control will support efforts to identify owners of stray/lost animals. If owners cannot be found, representatives will attempt to adopt or sell the animals according to their established procedures.

Animals for which no owners can be found and which cannot be placed in adoptive care or sold will be disposed of in accordance with established animal control procedures.

C. Livestock

1. Search and Rescue

Livestock loose or in need of assistance due to the emergency or to the death or evacuation of their owners will be the responsibility of the Livestock Committee (in so much as all reasonable steps will be taken to provide

assistance).

Identify key people to assist rescue efforts in field who have animal handling training and understand the basic emergency management concepts (ICS training). Appendix C

Identify transportation equipment and enclosures. Appendix A & G

Identify sources for animal restraint equipment halters, leather gloves, panels, chutes. Appendix C and G

2.. Evacuated Livestock

a. Private Resources:

Livestock from evacuated citizens will be sheltered at private facilities, at the owner's expense. Appendix C

A representative of the Livestock committee or authorized volunteer will provide assistance in the transportation of the evacuated livestock to either the shelter facility or veterinary hospital and ensuring that a tracking system is in place to unite sheltered livestock with their rightful owners. Appendix C

b. Livestock Evacuation Shelter:

If the need arises, the CART may open a livestock shelter. Livestock will be evacuated and sheltered by the owner or the owner may request assistance from the Livestock Committee.

A shelter or non-occupied livestock facility is difficult to find and maintain for an emergency only basis. Duplin County has no livestock show facility such as the Sampson County Livestock Arena.

Evacuated livestock will need to have shelter at private boarding barns or with private individuals. This list of people would be kept but could/would change according to available space. Feed, hay, bedding, etc. can be obtained through resources listed in Appendix G.

Additional supplies, including corrals and panels may be requested from **SART**.

Livestock Committee volunteers, **SART** personnel and private individuals will be trained in livestock management and will help maintain facilities.

3. Stray/Lost Livestock

Due to the size of most livestock and the inability to transport large numbers of farm animals, owners are expected to develop shelter and/or evacuation plans

for their own animals.

Private farms located throughout the county may be used as shelter facilities for livestock.

In the event of an emergency situation, the Livestock committee will contact prearranged farms and request their assistance in the sheltering operation. The owner will be expected to reimburse the private farms for all expenses incurred during sheltering of livestock.

*Maintain a list of volunteering farms, their capacity and health requirements. If necessary **SART** may be contacted for boarding assistance of livestock at possible locations such as: veterinary hospital at the NCSU College of Veterinary Medicine, Sampson County Livestock Arena or the Hunt Horse Complex.

4. Recovery

Livestock:

Duplin County Animal Control will support efforts to identify owners of stray/lost animals. If owners cannot be found, representatives will attempt to adopt or sell the animals according to their established procedures.

Animals for which no owners can be found and which cannot be placed in adoptive care or sold will be disposed of in accordance with established animal control procedures.

D. Wildlife

1. Search and Rescue

Wild Animals out of their natural habitat that are endangering either themselves or the human population will be handled in accordance with NC Wildlife Resource Commission guidelines

2. Stray/Lost and Recovery of Wildlife

If possible, wild animals outside of their natural habitat endangering the public will be transported back to their natural habitat. If the responsible agency is unable to transport the animal back to its natural habitat due to the nature of the emergency or to injuries that the animal may have sustained, the situation will be handled in accordance with North Carolina Wildlife Resource Commission guidelines.

3. Stranded Wildlife

If possible, wild animals outside of their natural habitat endangering the public

will be transported back to their natural habitat. If the responsible agency is unable to transport the animal back to its natural habitat due to the nature of the emergency or to injuries that the animal may have sustained, the situation will be handled in accordance with North Carolina Wildlife Resource Commission guidelines.

F. Additional Aid

In the event that Duplin County Animal Response Team's resources are unable to meet the need for search and rescue personnel, the Incident Commander for the Duplin County Animal Response Team will request search and rescue assistance from Duplin County Emergency Management who may request assistance from State Animal Response Team.

G. Incapacitation of Shelters:

In the event that established shelters are destroyed or incapable of functioning due to the nature of the emergency situation, assistance from: private boarding kennels, veterinarian hospitals, stables, adjacent county facilities, the Hunt Horse Complex, Sampson County Livestock Area, and the Pinehurst Harness Track may be requested, to open as boarding and/or medical facilities. In rare cases, during large-scale emergencies, animals may be moved outside Duplin County for care and protection.

H. Shelter Staff & Supplies:

1. Staff:

Private boarding kennels and veterinarian hospitals will be responsible for the staffing of their own boarding facilities and will be compensated by the citizens who use the animal shelter according to the established policies of the animal shelter.

Remaining animal shelters and hospitals will be staffed with available personnel from Duplin County Volunteers, assistance from **SART** and associated agencies.

Each individual animal shelter will be responsible for developing the work schedules for employees and volunteers.

2. Supplies:

Each animal shelter will identify resources for potable water, food, medical, cleaning and shelter supplies in advance of an emergency situation. Prearranged domestic and nondomestic animal food companies, medical suppliers, water

suppliers and cleaning product suppliers will be contacted and requested to begin the shipment of supplies to an established delivery point. The delivery point will serve as a storage center and a distribution center for the various shelters and hospitals.

If the need arises, resource agencies (e.g. kennel clubs) may be requested to donate cages and other various shelter supplies.

***I. Medical Assistance:**

1. Hospitals:

The Domestic Committee will coordinate the resources for a medical facility for domestic animals and equine which cannot be accommodated by the various shelters due to the animals' injuries. The Domestic Committee will identify private veterinarian hospitals and other locations that may serve as alternative medical facilities and medical shelters as space permits.

2. Staff:

Volunteers from the NCSU College of Veterinary Medicine and others will assist in providing the medical care in these medical shelters. Depending on the extent of the emergency situation, volunteers or Veterinary Medical Assistance Teams (VMAT) from the American Veterinary Medical Association may be requested to assist in the medical treatment of domestic and nondomestic animals.

J. Bites/Disease Control:

The Duplin County Health Department will make vaccinations available to rescue and shelter personnel and will insure that treatment of bites and injuries is available to affected persons.

Outbreaks of rabies and other infectious diseases are a serious threat during an emergency situation. Appropriate steps to minimize that threat will be implemented by the Duplin County Health Department.

4.7 Recovery:

A. Disposal of Animal Carcasses:

Disposal of deceased animals will be coordinated by the Mortality Disposal Committee.

They will arrange for disposal of:

- Euthanized animals
- Animals killed in the emergency situation

1. Farm Plan

Each producer should have a disaster plan that consists of the following:

- a. Identify evacuation route and equipment to move animals
- b. Identify on site designated land for burial
 1. Site needs to be adequate size and depth to accommodate population
 2. Site should be accessible to trucks (i.e. culverts over ditch)
 3. Spray fields can be used, but spraying can't resume until foliage has covered burial site.
- c. Determine a contact person to report damages and request assistance
 - County Cooperative Extension
 - Company representative
 - Emergency management coordinator.
 - Soil and Water Conservation District
 - Solid Waste Director
- d. Identify farms without approved burial sites

2. County Plan

- a. Identify all premises containing large populations of animals.
- b. Identify county contact person for administering

dead animal emergencies:

- County Health Director
 - County Extension Agent
 - Soil and Water Conservation District
 - Solid Waste Director
 - Other emergency management personnel
- c. Identify commercial clean out crews (people to remove dead animals and wet/destroyed bedding material). They typically have supplies such as bobcats, loaders and spreader and dump trucks. Appendix D
 - d. Identify equipment for handling/hauling dead animals (Examples: Bobcats, Front-end loaders, backhoe, trackhoes, sealable or leak proof trucks for transporting dead, plastic for lining trucks, latches for sealing trucks or large incinerators for burning the dead.) Appendix G
 - e. Make arrangements with other counties for resources and land space

3. *Priority on how to handle dead: Priority subject to change

during an infectious disease outbreak

- 1st consider rendering
- 2nd consider burial
- 3rd consider composting
- 4th consider incineration

- a. Rendering
Must be done rapidly (24-48 hrs) following disaster.
- b. Burial
See Attachment B: Animal Burial Guidelines During A Declared Agency, May 2000
- c. Composting
Primarily for poultry
High maintenance
Possible use for cover until burial arrangement could be made.
- d. Incineration
Worked poorly in the past
Consider last option due to past track record of improper fuel, costly, create logjam, air quality problem, inefficient, poorly trained personnel and ash disposal.
Plan for rapid restoration of power to rendering facilities, feed mills and processing plants.

5.0 Review and Update

On a regular basis, this procedure will be reviewed and updated as appropriate by Duplin County Animal Control Division, the Duplin County Health Department, and Duplin Emergency Management other affected agencies.

This procedure will be periodically tested by an appropriate exercise method.

Duplin County Soil and Water Conservation District

Duplin County Health Department/Animal Control

ATTACHMENT A

Duplin County Disaster Planning Tips For Pets, Livestock, and Wildlife

Domestic Pets

- If you evacuate your home, **DO NOT LEAVE YOUR PETS BEHIND**. Pets most likely cannot survive on their own, and if by chance they do, you may not be able to find them when you return.
- For public health reasons, many emergency shelters cannot accept pets. Find out which motels and hotels in your area allow pets. Include your local animal shelter's number in your list of emergency numbers-they will be able to provide information concerning pets during a disaster.
- Make sure identification tags are up to date and securely fastened to your pet's collar. If possible, attach the address and/or phone number of your evacuation site.
- Make sure you have a current photo of your pet for identification purposes.
- Make sure you have a secure pet carrier, leash or harness for your pet so that if the animal panics, it cannot escape.
- Take pet food, bottled water, medications, veterinary records, cat litter/pan, can opener, food dishes, first aid kit and other supplies with you in case they are not available later.
- Make sure you have a copy of your pets medical records. If you are unable to return to your home right away, you may need to board your pet. Most boarding kennels, veterinarians, and animal shelters require that your pets vaccinations be current.
- If it is impossible to take your pet with you to temporary shelter, contact friends, family, veterinarians, or boarding kennels to arrange for care. Make sure medical and feeding information, food, medicine and other supplies accompany your pet to its foster home.

Livestock

Evacuate livestock whenever possible. The evacuation sites should have or be able to readily obtain food, water, veterinary care, handling equipment and facilities. If evacuation is not possible, a decision must be made whether to move large animals to available shelter or turn them outside. This decision should be determined based on the type of disaster and the soundness and location of the shelter. All animals should have some form of identification that will help facilitate their return.

Wildlife

Wild animals often seek higher ground which, during floods, eventually become submerged (i.e., island) and the animals become stranded. If the island is large enough and provides suitable shelter, you can leave food appropriate to the species. Animals have a flight response and will flee from anyone approaching too closely. If the animal threatens to rush into the water, back away from the island. Wildlife often seek refuge from flood water on upper levels of a home and may remain inside even after

the water recedes. If you meet a rat or snake face to face, be careful but don't panic. Open a window or other escape route and the animal will probably leave on its own. Never attempt to capture a wild animal unless you have the training, protective clothing, restraint equipment and caging necessary to perform the job.

Beware of an increased number of snakes and other predators who will try to feed on the carcasses of reptiles, amphibians and small mammals who have been drowned or crushed in their burrows or under rocks.

Often, during natural disasters, mosquitoes and dead animal carcasses may present disease problems. Outbreaks of anthrax, encephalitis and other diseases may occur. Contact your local emergency management office for help.

Further Assistance

If you see any injured or stranded animal in need of assistance, or if you have any other questions or concerns about animal protection during an emergency situation, contact the Duplin County Emergency Management at _____ or the Duplin Co. Health Department at _____.

ATTACHMENT B Animal Burial Guidelines During A Declared Emergency

State Animal Response Team
May 2000

Introduction

Hurricane Floyd on September 15, 1999 combined with the weather conditions before and immediately after this hurricane resulted in the most severe flooding and devastation in North Carolina history. The flooding caused an estimated \$813 million in agricultural losses affecting 32,000 farmers. In addition to crop loss, there was significant loss of livestock including 2,860,827 poultry, 28,000 swine, and 619 cattle. Disposal of dead animals was a significant problem. Proper burial and disposal will prevent potential public health problems resulting from large numbers of dead and decaying animals including the spread of harmful pathogens, ground and surface water contamination, and pest control. In certain situations, burial of dead animals may be the best alternative for immediate disposal. These guidelines are designed to insure burial is done in a safe and effective manner.

Legal Authority

North Carolina General Statute 106-403 (NCGS) Disposition of dead domesticated animals states that is the responsibility of the owner or person in charge of his domesticated animals to bury dead animals appropriately within 24 hours after knowledge of the death. It is the responsibility of the municipal or county government to designate appropriate persons to dispose of any domestic dead animals whose owner cannot be identified. (See attached copy of NCGS 106-403 and companion opinion from the Attorney General's Office dated June 8, 1984). The NC Department of Agriculture - Veterinary Division is the lead state agency to oversee animal disposal as regulated under existing Administrative Rules, specifically, Subchapter 52C - Control of Livestock Diseases: Miscellaneous Provisions, Section .0100 - Diseased and Dead Animals (See Attachment C)

The State Health Director and by extension the Local Health Director in each county is charged with preventing health risks and disease and promoting a safe and healthful environment according to NCGS 130A, Articles 1-20. To the extent that dead animals become a threat to human health, the State and Local Health Director has broad authority to investigate and act on matters to protect health. The Environmental Management Commission protects the groundwater quality in the State of North Carolina through rules established in 15A NCAC Subchapter 2L "Classifications and Water Quality Standards Applicable to the Groundwaters of North Carolina." These rules establish groundwater quality standards that may not be exceeded without a permit issued under the authority of the Commission. The Groundwater Section of the Division of Water Quality is responsible for the administration and enforcement of these rules. Any surface or subsurface activity that has the potential to cause groundwater standards to be exceeded is subject to the regulatory authority of the Commission.

Scope

While it is recognized that there are multiple types and degrees of emergencies that could create the

need for dead animal burial, these guidelines focus on the most common cause and the most recent experience, flooding and electrical outages. For example, guidelines for managing dead animals during a foreign animal disease emergency may differ and would be managed through the State Veterinarian. These guidelines are intended to address dead animal disposal during a declared emergency and therefore do not take the place of the dead animal disposal that occurs under the normal permitted operation of a farm. The Governor can declare a state of emergency in North Carolina with or without a federal declaration of the same.

Emergency Planning

Each farm operation shall make specific plans for animal disposal in the event of an emergency. When burial is determined to be the disposal method of choice, an attempt should be made first to bury the dead animals according to guidelines on the owner's farm. If proper burial is not possible on the farm then plans should be made for alternative sites.

Burial Standards

1. The bottom of the hole where dead animals are to be buried should be 3 feet above the seasonal high water table and must be at least 12 inches above the seasonal high water table in an area of well-drained soil. (Farm owners may contact the local NRCS agency or the local health department for assistance in determining the seasonal high water table.)
2. Standing water in the hole does not preclude animal burial as long as the bottom of the hole is at least 12 inches above the seasonal high water table, not in an area of standing water, and the other conditions for proper burial are met.
3. There must be at least 3 feet of soil covering any buried animal. This can be interpreted to mean soil mounded over the animals above the adjacent ground level.
4. The burial site must be at least 300 feet from any existing stream or public body of water.
5. The burial site must be at least 100 feet from any existing well.
6. The burial site must be at least 300 feet from any existing public water supply well.
7. The burial site cannot include any portion of a waste lagoon or lagoon wall.
8. In the case where the burial site is in a waste disposal spray field, the burial site is not available for subsequent waste spraying until a new viable crop is established on the site.
9. The burial site shall be located so as to minimize the effect of stormwater runoff.
10. Burial is not permitted in the tiled area of an underdrained field.
11. A record of the location of the approved site (GPS latitude and longitude coordinates if available), the burial history of each burial site to include the date, species, head count and age must be kept by the owner and reported to the Local Health Director who will in turn will report this information to the appropriate State agency - DENR Division of Water Quality, Groundwater Section.
12. Farm owners and operators are encouraged to consider measures that could be taken prior to

an eminent emergency that could reduce the impact on the farm and the environment.

Collective Burial Site

A collective burial site may be designated to serve one or more counties in the event of a large-scale emergency whereby individual farm sites are not available. The responsibility for disposal of dead animals remains with the owner, lessee, or person in charge of any land upon which any domesticated animals die. The county or municipality should identify an appropriate burial site(s) with the capacity to bury up to 5% of the steady state live weight of livestock in that jurisdiction. The use of an existing county or municipal landfill as a dead animal burial site is legal and preferred.

Burial Site Approval

Best farm practices suggest that a burial site with the capacity to handle the type and number of animals most likely to be needed during an emergency for each farm operation be identified and pre-approved prior to the emergency. It is recommended that the emergency burial contingency plan be incorporated into the farm's existing farm plan and duly reported to the appropriate state and local agency.

ATTACHMENT C

§ 106-403. Disposition of dead domesticated animals.

It shall be the duty of the owner or person in charge of any of his domesticated animals that die from any cause and the owner, lessee, or person in charge of any land upon which any domesticated animals die, to bury the same to a depth of at least three feet beneath the surface of the ground within 24 hours after knowledge of the death of said domesticated animals, or to otherwise dispose of the same in a manner approved by the State Veterinarian. It shall be a violation of this statute to bury any dead domesticated animal closer than 300 feet to any flowing stream or public body of water. It shall be unlawful for any person to remove the carcasses of dead domesticated animals from his premises to the premises of any other person without the written permission of the person having charge of such premises and without burying said carcasses as above provided. The governing body of each municipality shall designate some appropriate person whose duty it shall be to provide for the removal and disposal, according to the provisions of this section, of any dead domesticated animals within the limits of the municipality when the owner or owners of said animals cannot be determined. The board of commissioners of each

county shall designate some appropriate person whose duty it shall be to provide for the removal and disposal, according to the provisions of this section, of any dead domesticated animals located within the limits of the county, but without the limits of any municipality, when the owner or owners of said animals cannot be determined. All costs incurred by a municipality or county in the removal of a dead domesticated animal shall be recoverable for the owner of such animal upon admission of ownership or conviction. "Domesticated animal" as used herein shall include poultry. (1919, c. 36; C. S., s. 4488; 1927, c. 2; 1939, c. 360, s. 4; 1971, c. 567, ss. 1, 2.)

ATTACHMENT D

State and local governmental bodies and other organizations and personnel who carry out emergency management functions under the provisions of this Article are required to do so in an equitable and impartial manner. Such State and local governmental bodies, organizations and personnel shall not discriminate on the grounds of race, color, religion, nationality, sex, age or economic status in the distribution of supplies, the processing of applications and other relief and assistance activities.

(1975, c. 734, s. 3; 1977, c. 848, s. 2; 1979, 2nd Sess., c. 1310, s. 2; 1995, c. 509, s. 128.)

§ 166A-13. Emergency management personnel.

(a) No person shall be employed or associated in any capacity in any emergency management agency established under this Article if that person:

(1) Advocates or has advocated a change by force or violence in the constitutional form of the Government of the United States or in this State;

(2) Advocates or has advocated the overthrow of any government in the United States by

force or violence;

(3) Has been convicted of any subversive act against the United States;

(4) Is under indictment or information charging any subversive against the United States ;

OR

(5) Has ever been a member of the Communist Party.

Each person who is appointed to serve in any emergency management agency shall, before entering upon his duties, take a written oath before a person authorized to administer oaths in this State, which oath shall be substantially as follows:

“I, , do solemnly swear (or affirm) that I will support and defend the Constitution of the United States and the Constitution of the State of North Carolina, allegiance to the same; that I take this obligation freely, without any mental reservations or purpose of evasion; and that I will well and faithfully discharge the duties upon which I am about to enter. And I do further swear (or affirm) that I do not advocate, nor am I, nor have I ever knowingly been, a member of any political party or organization that advocates the overthrow of the Government of the United States or of this State by force or violence; and that during such time as I am a member of the State Emergency Management Agency I will not advocate nor become a member of any political party or organization that advocates the overthrow of the Government of the United States or of this State by force or violence, so help me God.”

(b) No position created by or pursuant to this Article shall be deemed an office within the meaning of Article 6, Section 9 of the Constitution of North Carolina.

(1951, c. 1016, s.10; 1975, c.734, ss. 15, 16; 1977, c. 848, s. 2; 1979, 2nd Sess., c. 1310, s. 2; 1995, c. 509, s. 129.)

§ 166A-14. Immunity and exemption.

(a) All functions hereunder and all other activities relating to emergency management are hereby declared to be governmental functions. Neither the State nor any political subdivision thereof, nor, except in cases of willful misconduct, gross negligence or bad faith, any emergency management worker complying with or reasonably attempting to comply with this Article or any order, rule or regulation promulgated pursuant to the provisions of this Article or pursuant to any ordinance relating to any emergency management measures enacted by any political subdivision of the State, shall be liable for the death of or injury to persons, or for damage to property as a result of any such activity.

(b) The rights of any person to receive benefits to which he would otherwise be entitled under this Article or under the Workers' Compensation Law or under any pension law, nor the right of any such person to receive any benefits or compensation under any act of Congress shall not be affected by performance of emergency management functions.

(c) Any requirement for a license to practice any professional, mechanical or other skill shall not apply to any authorized emergency management worker who shall, in the course of performing his duties as such, practice such professional, mechanical or other skill during a state of disaster.

(d) As used in this section, the term “emergency management worker” shall include any full or part-time paid, volunteer or auxiliary employee of this State or other states, territories, possessions or the District of Columbia, of the federal government or any neighboring country or of any political subdivision thereof or of any agency or organization performing emergency management services at any place in this State, subject to the order or control of or pursuant to a request of the State government or any political subdivision thereof.

(e) Any emergency management worker, as defined in this section, performing emergency management services at any place in this State pursuant to agreements, compacts or arrangements for mutual aid and assistance to which the State or a political subdivision thereof is a party, shall possess the same powers, duties, immunities and privileges he would ordinarily possess if performing his duties in the State, or political subdivision thereof in which normally employed or rendering services.

(1957, c.950, s.4; 1975, c.734, s. 14; 1977, c. 848, s. 2; 1979, c. 714, s. 2; 1979, 2nd Sess., c. 1310, s. 2; 1995, c. 509, ss. 130, 131.)

Volunteer Agreement-Release and Acknowledgement of Risk

In consideration of being permitted to volunteer for Duplin County by performing emergency services as determined and instructed by the Duplin County Office of Emergency Management, I hereby certify, and agree:

- (1) That in accordance with N.C.G.S. §166A-13 I am not nor have I ever
 - (a) Advocated a change by force or violence in the constitutional form of government of the United States or this State;
 - (b) Advocated the overthrow of any government in the United States by force or violence;
 - (c) Been convicted of any subversive act against the United States;

- (d) Been a member of the Communist party;
 - (e) Been under indictment or information charging any subversive act against the United States;
- (2) I understand that before entering into any duties relating to emergency management that I may take a written oath.
 - (3) I understand and acknowledge that in performing emergency management duties there may be significant risk which include but are not limited to slips and falls, bruises, sprains, twists, jolts and even more life threatening hazards.
 - (4) I certify that I am fully capable of participating in and performing emergency management functions. I assume all risks including but not limited to those listed above which could result in my physical or emotional injury, paralysis, death, loss or damages to personal property arising out of my participation and performance.
 - (5) I agree not to use alcohol or drugs that have not been prescribed by a medical doctor to treat a current medical condition, while participating in or performing emergency management functions or duties or at any time that may affect my ability to participate in or perform said functions. I further agree not to use any prescribed medication that may affect my ability to participate in or perform said functions.
 - (6) I voluntarily, fully and forever release, discharge and agree to indemnify and hold harmless, on behalf of myself, my heirs, assigns, personal representatives and estate, Duplin County, any agents, officers, employees

and all other persons or entities acting in any capacity on their behalf from any and all claims, losses, injuries, and damages of any nature, attorney's fee and costs which may arise from, relate to or result from any willful misconduct, gross negligence or any act or omission in bad faith on my part while participating in or performing an emergency management function.
 - (7) I agree to follow all instructions and safety guidelines provided by and from staff of Duplin County Office of Emergency management and understand that I may be released from participation in or performance of emergency management duties for failing or refusing to follow said guidelines and/or instructions.
 - (8) I certify that I have adequate insurance to cover any claim, injury or damage I may suffer while participating, or else I agree to bear the cost of such injury or damage myself. I further certify that I have no medical, physical or mental conditions which could interfere with my safety or the safety of others. I have had sufficient opportunity to read

this entire document. My signature on this document is completely voluntary as is my decision to serve as a volunteer for Duplin County Office of Emergency Management. I fully understand that by signing, I give up legal rights that may otherwise be available to me. I have read and understood this document, and I agree to be bound by its terms.
