Farm Ag-Terrorism Preparation Worksheet

Completing this worksheet will help "bullet proof" your Farm:

1. Are your facilities secured? _____ Well lit? ___ Locked buildings? _____ Limited Access (locked gates/cables/fences)? _____ Community watch ___? Warning signs in place? _____ Would you be aware that someone had been on your premise?
2. Are your feedstuffs secure? Access limited? _____ If needed, where would you obtain feed for animals for 1 week? _____ Are pastures located near the roads? _____ (Most are but know that it increases risk)
3. Do you have a secondary source of water should primary source become contaminated? _____ (access to tanker truck, neighbor, County plan (fire depart) etc). Daily observation of water sources could detect tampering.
4. If the situation warrants, disposal of carcasses may be limited to on farm disposal. Are you prepared to dispose of carcass according to regulations (covered with 3 feet of dirt and 100 yds from flowing water)? _____
Source of digging equipment _____
5. Are you educated on the most likely Terrorist agents and how they would affect your animals? _____ Websites like www.ncagr.com/oep/ will help update you on the agents most likely to be used and their effects.
6. Do you know who to contact if witness something suspicious?
Local Law Enforcement _____ (also 911)
NCDA & CS 919-807-4301/919-733-7601
7. Are you aware of other Resources for information, advice, and/or help...
County Extension Office/Agents _____
Private Veterinarian _____
State Laboratories (necropsy): call 919-733-3986 for nearest lab
8. Do you have transportation resources or contacts to arrange for movement of your animals? _____
9. Do you have a generator to provide emergency power? Is your fuel supply secure? A farm diagram that locates fuel storage, pesticides, chemicals, fertilizers etc locations that could be provided to firemen or other responders is a good idea.
10. Some diseases (zoonotics like Anthrax and Plague) affect man as well as animals. Contact the Public Health Department if you notice that someone in your family becomes ill with signs similar to any ill animals on your farm. County Health Department ph. # _____.
